Infinity Air Purifier

Doesn't just filter air:

It's Captures and Kills™ technology is unforgiving when it comes to airborne pathogens such as bacteria, viruses and mold.

News

Deals for the Month

Now that its winter, you are spending more time indoors. How is the quality of the air you are breathing? Allow us to clear the air.

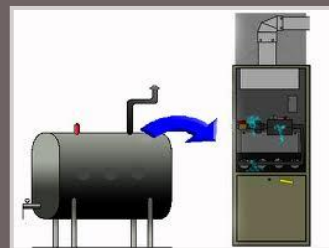

It takes more than an air conditioner to make sure the conditions in your air are ideal. Create a cleaner, fresher and healthier environment for your family with our UV lamps, humidifiers and air purifiers.

We offer the latest in indoor air quality.

UV Lamps: Our UV lamps mean lights out for mold and bacteria. They kill the organisms that can grow on the indoor coil of your cooling system. Eliminating these baddies does more than help improve your air quality, it increases your system performance as well.

Humidifiers: No one likes too much humidity. But too little can be just as irritating, especially in winter. When humidity drops too low, you might notice sore throats, chapped lips, itchy skin and sinus problems. You also might notice dry wood in your furniture—which can lead to long-term damage.

Air Purifiers: Our state-of-the-art air purifier systems trap and kill bacteria, viruses, mold spores, allergens and other pollutants in the conditioned air—and keep them out of the air your family breathes.

****OIL TO GAS****

WE DO OIL TO GAS CONVERSIONS. CALL FOR A FREE ESTIMATE TO SAVE MONEY ON YOUR UTILITY BILL.
